Subject: **ZX135-7EB Product introduction**

Category: **New Product Information**

Dear Dealer principal,

We are pleased to announce the extension of our electric excavator lineup, with the introduction of the new ZX135-7EB. This 13-ton class machine combines the trusted performance and reliability of Hitachi with advanced electric technology, delivering zero emissions and remarkably low noise without compromising on power or productivity. With flexible operation modes (battery and power grid assist), the ZX135-7EB is engineered to meet the evolving needs of urban, indoor, and environmentally regulated job sites. We believe this innovative excavator will empower your customers to take on new opportunities while supporting a cleaner, quieter future for the industry.

PHASE IN

The phase in for this model will commence in June 2026.

PRICING

The model selection is available in NEPTUNE.

ORDER INTAKE

The order intake for this new electric model starts from January 2026. Please note that there is a 9-month lead time from order to make.

MARKETING INFORMATION

To support your promotional activities around this model, the following marketing material will be available:

Data Sheet	Attached to the email announcement
Sales Manual	Uploaded on Dealer portal
English brochure (PDF format)	Expected in July 2026
High resolution Images	A few images are available on Dealer portal, more images expected in July 2026
Product film/walkaround	Expected in July 2026

WARRANTY

ZX135-7EB is covered by the renowned HCME standard warranty.

EXTENDED WARRANTY

Upon request, a quote for extended warranty can be provided. Please contact HCME Product Support for more information.

PARTS / SERVICE

The ZX135-7EB is seamlessly integrated into the HCME Parts & Service system. This ensures that parts are readily available through the ISF system and expertly managed by the Parts Center located in Oosterhout.

PRODUCT SUPPORT

Follows the standard machines product support of HCME. Direct contact in Product Support (FIR, claim handling, etc.) is your regional product support specialist.

PRODUCT LAUNCH TRAINING

Scheduled for 2nd half of 2026, exact dates to be determined based on machines delivery.

Kind Regards,

Norihiko Kinugawa

Product Manager
